

Plasco Mission Statement:

"We will provide quality parts and services on time and to customer specification and satisfaction while operating efficiently and effectively. This quality work and operating effectiveness will allow our company to grow and prosper providing benefit to the Plasco owners' and employees and to the customers being served."

Plasco Quality Policy:

It is the policy of Plasco, Inc. to provide custom injection molded parts, assemblies, tooling and related services that meet or exceed the customers' specifications with regard to quality and delivery, while remaining competitive in the market place through continuous improvement.

Plasco's management is committed to the implementation of ISO 9001:2000 standards. Meeting these requirements will create a work environment that allows Plasco, Inc. to maintain positive customer satisfaction while remaining competitive in the market place. These standards are regularly reviewed for their effectiveness.

Plasco's management has established measurable quality and delivery objectives, and ensures these objectives are communicated, understood, implemented and continually improved.
